

## WORKSHOP PROGRAM

Kokoda Trail Motel (Sogeri Plateau, Central Province)

7-8 February 2013

# ***A Way Forward – Needs, Challenges and Opportunities for Papua New Guinea on Climate Change, Land Use and Forest Resource Management and Payment for Environmental Services (PES)/REDD+***

1. Informing and Updating everyone on where we are re Climate change forecasts, international agreements, conditions etc...,
2. Updating everyone on PNG policy formulation on climate/natural resource use/PES-REDD+, etc and who's making what progress with the science and community interaction at the local project level etc
3. Addressing the issues/conditions and challenges – that would enable PES/REDD+ to operate in PNG, on a sustainable basis and providing (adequate – i.e. competitive) long term and equitable local benefits; whether these can be achieved, where, by whom and if so how we're going to progress this
4. And especially trying to gain some consensus on the **way forward** if PNG is going to be able to play its part and participate/utilise these mechanisms (and partnerships) towards positively influencing resource use (and avoid being ripped off by SABLs), and secure better and sustainable benefits for customary resource owners in PNG whilst improving natural resource utilization/conservation etc..
