Key building blocks of the model

Enabling factors

Community awareness of livelihood and conservation options

Village level Land Use Management Plans

Land Use Management Agreements with LLGs

Sustainable financing mechanisms for marketing natural resources (goods and services)

Empowered communities

Enabling regulatory framework

Scientific and technical knowledge on all aspects of conservation and development

Active facilitation

Traditional knowledge on land management and ownership

Capacity building (community facilitators, communities, government officials)

Political will (all levels)

Strategic partnerships

Natural resources sustainably managed, key biodiversity conserved and livelihoods improved
